Inspired by the look of Kufic script, a style of Arabic calligraphy.

A sample of the Alhambra font showing the word 'مَنْظِمَةُ' in a stylized, connected Kufic script.

Typed as alhambrA

A sample of the Alhambra font showing the word 'مَنْظِمَةُ' followed by 'تَعْلِفُ' in a stylized, connected Kufic script.

Typed as alhambrA deeP

Here are some hints you can use to improve the look of your work with these fonts:

1. Type your text using all lowercase. Those letters are designed to link best.
2. Use a capital letter at the end of each word. Those letters do not link to the right.
3. There is a starting swash in the { position and an ending swash in the } position.

A sample of the Alhambra font showing the word 'مَنْظِمَةُ' with a starting swash on the left and an ending swash on the right.

Typed as {alhambrA}

4. Extend the beginning and ending strokes or extend individual words with these:

■ Type ^ or ~

■ Type \_
